

# SHOW ME THE MONEY

Exclusive to authorized AgDNA dealers, Pixel Profit automatically calculates critical profit and loss management zones on every acre. See precisely which regions of a field are performing and make informed decisions on how to address profit limiting factors.

## THE MOST POWERFUL PROFIT AND LOSS ANALYSIS TOOL COMMERCIALY AVAILABLE

- ✓ **View profitability** on every acre
- ✓ **Future-proof** your investment
- ✓ Turn data into **dollars**
- ✓ **Fix** profit limiting factors

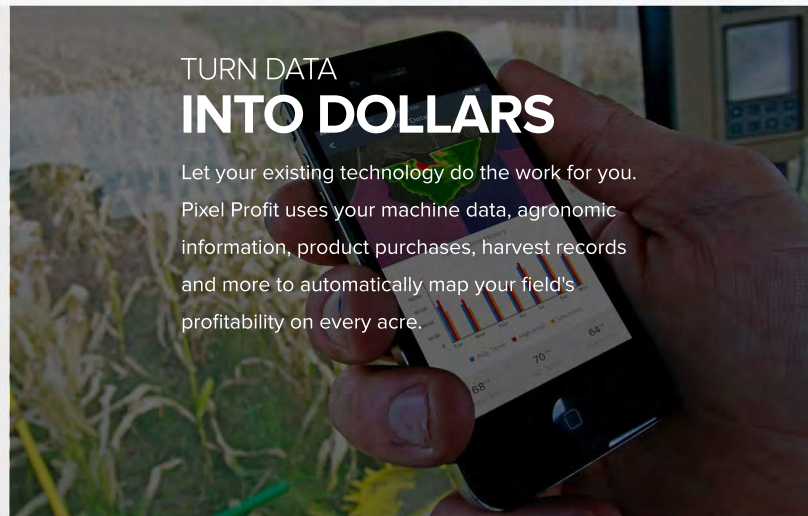

## INTRODUCING THE NEXT BIG THING

Maximize your operation's potential with automated profitability analysis on every acre. Pixel Profit analyses every field activity, crop input and bushel harvested to create a profitability map for every field.

- **VISUALIZE** crop performance
- **IDENTIFY** potential losses, and
- **EVOLVE** your growing strategy in real-time

## TURN DATA INTO DOLLARS

Let your existing technology do the work for you. Pixel Profit uses your machine data, agronomic information, product purchases, harvest records and more to automatically map your field's profitability on every acre.

## EXCLUSIVE TO PRECISION PLUS

Turn data into dollars with Pixel Profit's predictive visual profit and loss mapping

## START FUTURE PROOFING

Pixel Profit is available now as part of AgDNA's Precision Plus toolkit - for only a **few dollars an acre**, Pixel Profit is the most accurate way of calculating genuine ROI using the most relevant determinate factors.
